

ROLLING CATS

THE CUTEST LEARN-2-EARN
YOU'VE EVER SEEN

What's the problem?

Trading platform Crypto.com estimates that **1 billion people** will invest in cryptocurrencies by the end of this year.

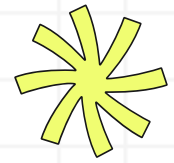

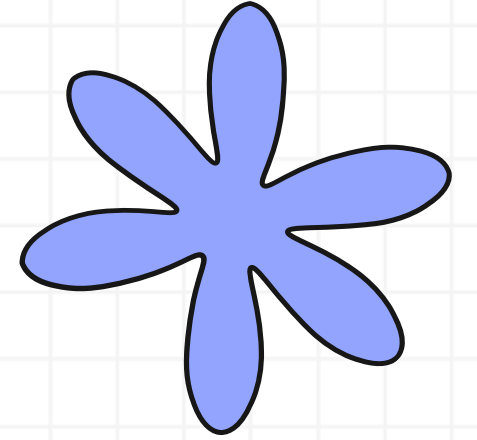

There's gonna be a lot of fresh blood soon and the crypto knowledge is spread all over the internet, so **newcomers are gonna need some help**.

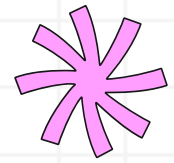

Let's face it!

Even if you've been in the field for some time, your memory could let you down — that's why you need to refresh it once in a while.

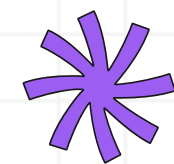

Why does it matter?

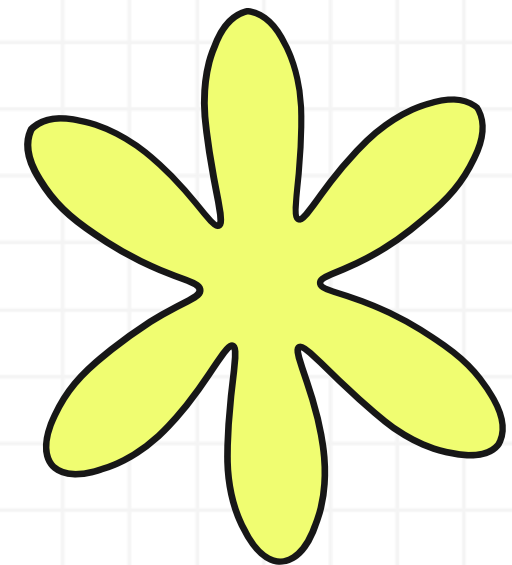

Playing quiz with your friends and colleagues is a great way to **get new knowledge and unite.**

Cognitive psychology strongly suggests that the act of retrieving information directly helps students learn.

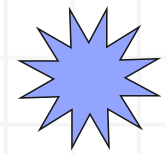

This benefit occurs even in the absence of feedback and in the absence of an opportunity to restudy the information.
